

Digging Works

4

Do not enter excavations or trenches that are deeper than 1.2 meters, not surrounded or with sides that are not properly sloped, or any excavation or trench with a depth of less than 1.2 meters without appropriate shoring system, otherwise there is a risk of collapse. Use a ladder or appropriate stairs for entering and exiting the excavation.

Work Surfaces and Scaffolding

5

Do not exceed the manufacturer's load capacity instructions on work surfaces. Work on an edge shall only be done when it is stable and secure. Ensure to cover or fence openings on the floor (including pits). Pay attention! It is prohibited to dismantle parts or edge supports.

Throwing Objects from a Height

6

Do not throw objects and waste from a height

Ladders

7

Climb only on a stable and safe ladder; make sure to hold three grip points on the ladder going up/down the ladder. Avoid, as much as possible, doing prolonged work while standing on it.

Personal Protective Gear

1

Use standard personal protective gear, such as safety helmets, safety shoes and clothing that covers most parts of the body in both winter and summer. In tasks involving splatter particles, splashes, and the like, it is necessary to use safety goggles, and as needed, gloves, ear protection, respiratory masks, and more.

Work in Heights

2

A worker authorized for this, who has a valid training certificate, will perform work at heights. The worker at height should receive training from the manager regarding the risks in his work and ways to minimize the risk.

Tools

3

Only tools suitable for the type of work should be used

המוקד הלאומי "קו החיים"

Basic safety rules for workers in the construction industry

STOP! If you have not received training or do not have the knowledge or the appropriate qualification to perform the assignment.

**Lifting Machine
and Crane**

8

A qualified operator who will make sure that the machine has a certificate of inspection by a qualified tester will operate the lifting machine.
Do not work under a raised load.

**Obstacles, Protruding
Nails and Sharp Edges**

9

Obstacles, Protruding Nails and Sharp Edge One must ensure a clean work environment free from obstacles and hazards. Work with safety shoes compliant with regulations and with a safety helmet equipped with a chinstrap

**Report to the
Supervisor**

10

Turn to the supervisor for guidance if you are unsure how to perform the task professionally and safely. Immediately report any abnormal events, incidents, or risks you witness at work or in the environment to the supervisor.
