

National Call Center "Life Line" *9214

The citizen sees a defect / hazard at the construction site, reports to the "Life Line" call center using mapa.osh.org.il website or calling *9214

The call is received at the national call center "Life Line" that sends a safety guide to the reported site.

An instructor of the Occupational Safety and Hygiene Administration comes to the site and performs a diagnosis and training for the manager. In accordance with the risks identified by the instructor on site, a report is forwarded for further attention to a regional labor inspector.

A regional labor inspector receives the report and decides on ways to attend to the issue.

National Call Center "Life Line" *9214
